Assignment 2A

1 Exploring The Course Management System (CM

Q1
How many entity classes are there in the schema (org.example.schema.CMS.*)?
5 entity: Course, Student, Professor, transcript, Teaches

Q2
What purpose does the cms-ddl.sql file serve? Where is it used?
Purpose: cms-ddl.sql defines the database schema: the five tables (course, professor, student, teaches, transcript) with their columns, data types, primary keys, foreign keys and constraints.
Where it is used: In CMS.dbconfig, Uses /config/cms-ddl.sql as the schema for “dbDdl”, and makes the package “schemaPackage”: “org.example.schema” to be used in later on.

Q3
What are the foreign keys of the transcript table?
studentId: from student(studentId)
courseId: from course(courseId)

Q4
How many parameters does the FindStudent query have?
It has one parameter, the studentId

Q5
What format is the database stored in?
Stored in a DuckDB Database in RAM.
